E-R Model (UD2)	The E-R model has not been created, or there are more than 3 incorrect entities and/or relationships.	Entities and relationships are partially identified, but there are several errors in the diagram and/or in the identification of primary keys.	Entities and relationships are identified, but there are 1 or 2 errors in the entities, relationships, or primary keys.	All entities and relationships are correctly identified, with only minor errors in the identification of primary keys. The diagram is created digitally using appropriate software.	All entities and relationships are correctly identified. Primary keys (PK) are correctly identified. The diagram is created digitally using appropriate software.apropiado.

Relational Model (UD3)	The relational model has not been created or has been created incorrectly.	The tables are partially created, but there are several errors in the identification of tables, PKs, FKs, or in the transformation of relationships.	The tables in the relational model are correctly identified, but there are errors in the transformation of relationships and/or in the identification of PKs or FKs.	The tables are correctly created, with only minor omissions or errors in the identification of PKs and/or FKs.	The tables are correctly created, including all PKs and FKs.FK.
%40					
Normalization (UD 4)	3NF is not checked, or the tables have not been normalized.	An attempt has been made to normalize the tables, but the 3NF process has not been correctly applied.	The tables have been normalized to 3NF, but the process has not been followed or the justification is incomplete.	All tables are in 3NF, but the reasons for this have not been explained in detail.	All tables are in 3NF and the reasons for this are explained in detail.el motivo.
